

ATB Consulting, Inc.

APPLICATIONS • TECHNOLOGY • BUSINESS

OUR MISSION

ATB Consulting, Inc., provides high-quality client/server solutions for today's dynamic business environment. From requirements definition, data and system flow analysis, design and development through implementation -- we can provide complete project life-cycle functionality:

- REQUIREMENTS GATHERING
- RESOURCE ORGANIZATION
- LOGICAL ANALYSIS/DESIGN
- DATA DEFINITION/LOGICAL DATABASE DESIGN
- NORMALIZATION/PHYSICAL DATABASE DESIGN
- PLATFORM CONFIGURATION
- PROTOTYPE DESIGN/DEVELOPMENT
- FINAL SYSTEM IMPLEMENTATION
- SUPPORT/ENHANCEMENT DEFINITION

Our successes are the result of 20 years of industry experience with a focus on new and emerging technologies to implement tomorrow's solutions.

APPLICATIONS

ATB employs the data-centric modeling approach to system design. An accurate data model drives application development toward success today — and flexibility tomorrow. Through the client/server environment, the data is readily available to meet the needs of your business.

TECHNOLOGY

ATB makes use of the appropriate technologies to implement applications. Open, non-proprietary platforms allow for future migration as business system needs evolve. We encourage the use of industry-leaders in system tools to protect your investment, both in future support and resource availability.

BUSINESS

ATB recognizes that systems impact business in many ways. Analysis must be performed to transfer business intelligence to the application. However, the effect the application has on current and future business practices must also be identified. Our experience in these areas promotes successful application implementation.

The application is only one component of a successful system. An accurate data model acts as a solid base for any future development. The appropriate use of available technology promotes the collection and analysis of data. All must be viewed within the context of the current and future business environment — the most critical aspect of any system implementation.

COMPANY PROFILE
